

Z-UNO SHIELD

Z-Uno Shield is a multifunctional DIN-rail smart home device can be customized to your needs. It can become a relay, a dimmer, a sensor, a valve controller, a door lock or an alarm system.

It requires no soldering and no programming — configure, wire and include in the Z-Wave network.

Z-Uno Shield comes in DIN-rail case or Sealed case and have terminal strips for easy connection. An easy-to-use configuration tool will help you to define the behaviour of your Z-Uno Shield depending on the connected devices.

HARDWARE SPECIFICATION

Up to 4 analog outputs 0-10 V

Up to 4 PWM or switch outputs
(up to 5 A per channel)

RS485 or UART

Up to 8 digital 0/3 V inputs
or outputs

OneWire for DS18B20

Up to 4 digital 0/3, 0/5
or 0/12 V digital or analog inputs
